
Preset: us-letter-10up · offsetX: 0mm · offsetY: 0mm

Print at 100% ("actual size" — turn off "Fit to page") on plain paper. Hold it over your precut sheet, or up to the light, and compare the card outlines and corner marks to the mm rulers along the top and left edges; enter any drift you read off as the X/Y offset (mm), then download your deck with the same offset.
